Ring Information:

1. Finger Size: _____

**It is strongly recommended that you have your finger size measured by a local jeweler.*

**Ordering a half size larger is recommended if being sized by a jeweler, because the sizing tool jewelers use is not as thick or as wide as the actual ring product, possibly making the ring fit tighter than smaller sized rings, and it is always better to have the ring too large rather than too small.*

2. Name—the way it is to appear on the right shank of the ring.

Space limit: 10 (example: STIGGINS)

3. Induction Year (goes below the design on the right shank of the ring)

Space limit: 4 (example: 2004)

4. Name—the way it is to appear on the inside of the ring.

(Example of engraved name: CHUCK STIGGINS)

Note: The left shank is already set as to the design specifications due to the design itself. It will have “CSCCa” above the design, and “MSCC” below the design.
